

{Whats the deal?}

I'm apprehensive towards ladies 'round the way  
They tend to have to have so much to show and so little to say  
But once in a while a diamond's found deep beneath the cold  
Madd deep like my rhyme is found deep beneath my soul  
But you, you fit the bill  
Me and you was fit to chill  
In your prescence yo I can't sit still  
You a queen like no other, all people lover  
Instinctive nurturer, the perfect future mother  
And not brainwashed by TV  
So when we speak we can exchange true philosophy  
Figure curvacious mad vivacious  
Ambition lever tenacious good gracious  
We need to move into a spot that's spacious  
And conjure up a plan to unite the races  
I'm saying lady ain't no doubt about it  
Every move you make is graphic  
I thought it was a myth a honey could stop traffic  
Apealling mind body and soul  
Daily focus with your head keeping self control

I said excuse me baby dog but I like your style  
I said excuse me baby dog

Exquisite mentality's a requisite  
If it's to your peoples benefit then you reppin' it  
It's definite, your always the shit I hope I step in it  
Cuz you got to get a brother off his ass weapon kit  
And I'm trying to motivate  
There's nothing sexier than when a woman know the state of the world  
The reason I say woman not girl is cuz you earned it  
You on some shit like if it's a lesson then I'm a learn it  
Fuck a fur coat you'd rather save the mink ("right")  
And you ain't stressin' ice unless you need it for the drink  
("I think") Me and should have a conference  
Cuz anything other than me and you building is nonsense  
But you busy with your many endeavors  
So I guess that we could talk about this shit whenever  
And when you walk away you got nothing up your sleeve  
I hate to see you go but I don't mind watching you leave  
Every move you make is graphic  
I thought it was a myth a honey could stop traffic  
Apealling mind body and soul  
Daily focus with you head keeping self control

I said excuse me baby dog but I like your style  
I said excuse me baby dog
