

So Special

Al B. Sure!

Can you feel it baby?
I know that when I first saw you
I knew you were that special lady - yeah

All the love you give to me
Oh is so special
Special girl (Oh...Father)
Special girl

All the love you give to me
Oh is so special
In the morning is so special
Special girl (oh no, oh no) special girl

Ooh the way you touch my body I get a chill
Everytime I see your face I know
I know I love you still (...still will)

Hold my body, hold it tight and I just might
Take you places you've neer been before
All through the night

When you're not here with me I can still taste your lips
Oh I can feel that heart beat right through me
With just one simple kiss

I'll never leave you
(See, we were friends before we were lovers)
Oh and we started out right
Now we've known each other for a little while
Let's make love all through the night

Two hearts as one, your hand in mine
Ooh let's make love like the first time...oh!
Two hearts as one, your hand in mine
Keep your eyes on me, through as as climb...

Higher...oh Father
And higher...can you help me
And higher...understand this lady?
And higher - oh oh

Morning, noon & night hold my body, hold it tight!
Special girl, you're my special lady

Girl, can I take you higher?
