

# I Wish You Were Here

Al Green

Lookin' out my window, sun shinin' bright  
Birds singin', tryin' to make things right  
I've got good music on my radio  
How did your love songs play from those doors?

I don't want no one to come in to catch me sigh  
But every since you left, said goodbye  
I wish you were here with me  
I wish you were here with me

[?] 'bout your kiss, gloom all around me  
Seem like love is never gonna find me  
I keep on looking for a, a brighter day  
When all I see is time slipping away

I've got to stop and get myself together  
All I can see is stormy weather  
I wish you were here with me  
I wish you were here with me

I've got to stop, get myself together  
'Coz all I can see is stormy weather  
I wish you were here with me  
I wish you were here with me  
I wish you were here  
I just wish you were here with me
