

## Way To Your Heart

Al Jarreau

So you say that I have gone too far  
That I really don't know who you are  
And did you tell me that you've got to cool your feelings?  
So did you say I've fallen overboard  
Every danger sign I just ignored  
That you never meant to put me out to sea

Ask me where I've been  
Heaven knows I've sinned  
Waiting in the wings and wasting time  
I've been watching you

From the secret corners of your mind

Girl, I know the way to your heart  
It's in the stars - you're destined to be my baby  
Girl, I'll be so good to your heart  
You'll wonder why you question to be my baby

I want to labor looking after you  
I want to bless you when you say 'k-choo'

I want to touch your face and watch you while you're sleeping  
And could you make a little one or two  
And could you please make sure they look like you  
And they could share in all the secrets we've been keeping

Have I gone too far?  
Reaching for a star?  
Heaven here on earth is what I crave  
I don't know what to say  
I get so carried away  
To this dream I'll always be a slave

So put your fears aside  
? open wide  
I'm the one who knew your where and when  
I'll be so good to you  
I hope you'll ask me to  
To take you there and take you back again
