

# Anywhere on Earth You Are

Alan Jackson

I've been riding these blue highways  
Another night has made me stop  
My weary bones can go no farther  
And here's where they'll drop

In my dreams your arms will find me  
They will hold me through the night  
Then release me to my journey  
As another day grows light

I've got so many miles to go  
And promises to keep  
Right now all I wanna do  
Is be anywhere on earth you are

I've always been a gypsy  
And the road calls me to roam  
But each day brings me closer  
To the place where we call home

Still got many miles to go  
And promises to keep  
Right now all I wanna do  
Is be anywhere on earth you are

In my dreams your arms will find me  
They will hold me through the night  
Right now all I wanna do  
Is be anywhere on earth you are
