

# That Particular Time

Alanis Morissette

1. My foundation was rocked  
My tried and true way to deal was to vanish  
My departures were old  
I stood in the room shaking in my boots  
At that particular time love had challenged me to stay  
At that particular moment I knew not to run away again  
That particualr month I was ready to investigate with you  
At that particualr time
2. We thought a break would be good  
For four months we sat and vacillated  
We thought a small time apart  
Would clear up the doubts that were abounding  
At that particular time love encouraged me to wait  
At that particualr moment it helped me to be patient  
That particular month we needed time to marinate in what "us" meant  
At that particular time
- R: I've always wanted for you  
What you've wanted for yourself  
And yet I wanted to save us high water or hell  
And I kept on ignoring the ambivalence you felt  
In the meantime I lost myself  
In the meantime I lost myself  
I'm sorry I lost myself...I am
3. You knew you needed more time  
Time spent alone with no distraction  
You felt you needed to fly  
Solo and high to define what you wanted  
At that particualr time love encouraged me to leave  
At that particular moment I knew staying with you meant desserting me  
That particualr month was harder than you'd believe  
But I still left at that particualr time
