

## It Passes Always

Alarum

Nature allows nothing but herself  
It's why we're placed between her motions  
To build and thrive like material gods  
The stubborn fixtures that she always removes  
see to believe, so many to breathe  
Pleasing selves create to occupy  
One look would be a step inside me  
I am a constant in the ever's change  
As I dream I see when other's seem  
It passes always  
Underneath the outermost skies  
The one who seeks, the one who finds  
It passes always

[solo - Evans]

One look would be a step inside me  
I am a constant in the ever's change  
As I dream I see when other's seem  
It passes always  
Tidal, the wave that gives memory  
Underneath the outermost skies  
Spoken thoughts that circle me  
The one who seeks, the one who finds  
It passes always

[solo - Young]

Out from below down through  
Our rings of smoke  
A concrete mass emerges as one  
Its residence points towards an end  
As it passes always a change will carry on
