

# By The Night

Albert Hammond

Here we are alone now  
Love is growing strong now  
Feeling so inspired  
By the night, by the night

Looking at the sky at night  
Everything is peaceful  
Welcome to my world  
Here there are no strangers  
Here there is no danger  
I'm happy in my world

Daylight finds me working just to stay alive  
But God, you know I'm living for the night

Words of love are spoken  
Hearts are never broken  
Feeling so inspired  
By the night, by the night

Put your arms around me  
Let your love surround me  
Keep me warm inside  
Let the sky above us  
And the earth below us  
Take us through the night

There's no way of telling just how far we're gonna go  
But, girl, we've got until the morning light

All the time I'm wishing that the night would never end  
I just want to keep this love alive

Lay your body down now  
Love is all around now  
Feeling so inspired  
By the night, by the night

By the night, by the night
