

# Moonlight Lady

Albert Hammond

It was late in the night, when I came by an open window  
She was in satin and lace in the glow of a softly fire  
She had secrets so share, 'cause she'd been everywhere the wind blows  
And so deep in her eyes lay the mirror of my desire

Moonlight Lady, come along with me  
Leave your dark city lights, its alright  
'Cause the nights on me  
Moonlight Lady, come along with me  
Leave your dark city lights, its alright  
'Cause the nights on me

And so softly we walked through the streets of a sleeping city  
Waking up dreams that lay quit a million years  
And I silently weep that the power of her golden beauty  
'Cause I knew that we 'd have to forget we were ever here

CHORUS: Moonlight Lady, come along with me  
Leave your dark city lights, its alright  
'Cause the nights on me

There were beggars and kings and a magical sky  
There were wings in the air an I learned how to fly  
There was me, there was you and suddenly you were gone

Moonlight Lady, come along with me  
Leave your dark city lights, its alright

'Cause the nights on me  
...
