

Lipstick

Alesha Dixon

I said are you ready
Uh, Yeah, hey
Come on, hey, hey, hey, hey, hey

Let's do it
Are you ready

Whoa-whoa-yeah
Whoa-whoa-yeah

All my ladies
Lets do it
Come on

I know the girls inside there wanna get on with the ladies,
But there are always fellas there to stir and make you crazy,
They try to get you flaky
Can't find no buts no maybes,
You think that girl's a traitor,
But that man's the instigator

Turning up with your jewellery on,
Making moves with your lipstick on,
Want some of that cushy stuff,
Whoa---whoa-oooh
Lets jump when the music's on,
All my girls living up till dawn,
Want a little bit sing this song,
Whoa-whoa-oooh

Why do you think that every girl out theres your enemy,
You're looking at her with the green eyed filled with jealousy
It's not the way its supposed to be,
So c'mon ladies dance with me,
And I'll tell ya,
No, n-n-n-n-n-no, no , no, no, no, no, no, NO

Turing up with your jewellery on (Oh yeah)
Making moves with your lipstick on,
Want some of that cushy stuff,
Whoa---whoa-oooh
Lets jump when the music's on,
All my girls living up till dawn,
Want a little bit sing this song,
Whoa-whoa-oooh

Whoa

Mmm

Feel the rhythm in your body,
Gotta lose control,
All the ladies get together,
We'll be on a roll,
Feel it in your soul,
If you wanna get on down,
Then its time to look around,

We're all the same,
Yeah

You gotta think about it,
You're beating up yourself

(Yeah yeah yeah)

Turning up with your jewellery on
Making moves with your lipstick on,
Want some of that cushy stuff,
Whoa---whoa-oooh
Lets jump when the music's on,
All my girls living up till dawn,
Want a little bit sing this song,
Whoa-whoa-oooh

Turning up with your jewellery on
Making moves with your lipstick on,
Want some of that cushy stuff,
Whoa-whoa-oooh
Lets jump when the music's on,
All my girls living up till dawn,
Want a little bit sing this song,
Whoa-whoa-oooh

Whoa-Whoa-Yeah
Whoa-Whoa-Yeah

Want some of that cushy stuff (Whoa Whoa Ooh)

Whoa-Whoa-Yeah
Whoa-Whoa-Yeah

One of them better sing this song
