

# Stars

Alessia Cara

Knock on my door, boy come home  
You stay in my head  
Lay in my arms, why won't you?  
It's been way too long  
What you waiting on?  
Cause I've been laying here  
Learning what the memories won't do  
See I need you and baby I need to  
Let down my guard and give you my scars  
Open up my heart

We could be stars...  
We could be stars...  
We could be stars...

Rap on my window, come home  
It's been a while, so stick around  
Why don't you?  
'Til the end of time  
Say that you'll be mine  
An uphill climb fighting what the heart  
Really wants to do  
See I need you  
And sometimes we need to  
Shed our facade and be just who we are  
All broken and torn, then we could be stars

Oh we could be stars...  
We could be stars...  
We could be stars...

Piercing lights in the dark  
Make the galaxy ours  
Kingdom right where we are  
Shining bright as a morning  
You'll never be lonely  
Just promise you'll love me  
I'm never too far  
And we'll never part  
And we could be stars

Oh we could be stars...  
We could be stars...  
Oh we could be stars...

Just find way to get home  
There's a space in my heart  
Open arms for you to run to  
Baby close your eyes and take the leap  
To make believe in fairytales  
I'll meet you there  
Oh yea, I'll fall too  
See I've wanted you here  
All along but my fear  
Just keeps haunting me won't let me go  
So it's hard to say I love you

We could be stars...  
Oh we could be stars...  
We could be stars...  
We could be stars...
