

# Love The Way You Miss Me

Alex G

You're miles away and loving me better  
And I'm thinking you should stay there forever  
'Cause I've seen a side of you that I'd never known  
(I love the way)

Middle of the night I was thinkin' about you  
Must've read my mind 'cause you lit up the room  
When the telephone rang and I saw your name  
The butterflies came and stayed till morning

You playing me a song, said you wrote it about me  
I'm trying to sing along, but the static is crazy  
I'm loving the way you keep me waiting  
I'm starting to like the distance, baby

You're miles away and loving me better  
And I'm thinking you should stay there forever  
'Cause I've seen a side of you that I'd never known  
And I love the way you miss me  
You miss me (3x)

Staring at the ink 'cause I like what I'm reading  
27 things you've been missing about me  
Look what you've done, you got me hanging  
I'll never reword it, I can't explain it

All the times that I didn't think you were listening  
I didn't realize you needed space, not convincing  
Starting to think you've finally got it  
The fairytale love I've always wanted

You're miles away and loving me better  
And I'm thinking you should stay there forever  
'Cause I've seen a side of you that I'd never known

And I know you'd rather us be together  
But it's nice to feel the love in your letters  
And maybe you shouldn't come back home  
And I love the way you miss me  
You miss me (4x)

It's not that I don't want you here  
But when you're gone, you feel so near  
I'm starting to think you finally got it  
Fairytale love I've always wanted, yeah

You're miles away and loving me better  
And I'm thinking you should stay there forever  
'Cause I've seen a side of you that I'd never known

And I know you'd rather us be together  
But it's nice to feel the love in your letters  
And maybe you shouldn't come back home  
And I love the way you miss me  
You miss me (4x)
