

Leave my business

Alians

wake up one morning
and you got no tea
little one, litte one
you're so sorry to me but
that's nobody's business but my own
the other day comes and it happens again
don't think that I am gonna feel ashamed
that's nobody's business but my own

so you better
leave my business
you better
leave my business
you better
leave my business but you mind your own

if I get high and fly like bird
you should never say a word
that's nobody's business but my own
if you drink rum and tumble down
you're gonna always get your fun
that's nobody's business but your own

so you better
leave my business
you better
leave my business
you better
leave my business but you mind your own

if I get high and fly like bird
you should never say a word
that's nobody's business but my own
if you drink rum and tumble down
you're gonna always get your fun
that's nobody's business but your own

so you better
leave my business
you better
leave my business
you better
leave my business but you mind your own
