## It's Me

Alice Cooper

You took a first-class trip to Paris You danced in the streets of Spain You followed the sun to Rio de Janeiro Cuz you got so sick and tired of the London rain But honey, late at night When you close your tires eyes You'll be there And I'll be here And one of us will cry

It's me, it's me When you need something more Something you're dying for It's me, it's me When you can't see too clear Baby, I'm always near It's me

You played your cards, you felt the sorrow Cuz all that dealer dealt was pain But baby, where you gonna play tomorrow The stakes were too damn high And now, you're broke again You can trip around till all your money's blown But who's the man that'll take you in When all your luck is gone

It's me, it's me What are you searching for I know you can find my door It's me, it's me I know you've sinned every sin But I'll still take you in It's me

And me I'm sitting here Nothing much has changed You broke my heart to pieces babe But that's nothing strange Well, I ain't angry That's all come and gone My arms are still open wide girl To catch you when you fall

And if someday you realize Just where you belong I'm the man that'll take you in When all your luck's gone It's me, it's me

When you need something more Something you're dying for It's me, it's me When you can't see too clear Baby, I'm always near It's me, it's me
What are you searching for
I know you can find my door
It's me, it's me
I know you've sinned every sin
But I'll still take you in
It's me
Yeah, baby, it's me
