

Got The Hunger?

Alice Russell

Some things going on
Some things going wrong
Something feeling mighty bad
And it's making us all feel so so sad
Because the people they open their mouths
And nothing but lies fall out
They keep on talking round and round
Pacify the crowd
But this song has been, sung about, many times before
I got hunger, I got hunger
I got hunger, I got hunger
I got hunger, I got hunger
I got hunger
Some things always telling me
I fall so hard I can hardly breathe
Citizens of the earth take flight
and Seen as one with all our might
So many rules and regulations
They're putting us in our place
They say it makes us comfortable
They say it keeps us safe!
But it only makes things scary, And fills us full of fear
I got hunger, I got hunger
I got hunger, I got hunger
I got hunger, I got hunger
I got hunger
(we got to work together)
What you gonna do? What you gonna do?
What you gonna do? What you gonna do?
What you gonna do? What you gonna do?
What you gonna do? What you gonna do?
Because people they open their mouths
And then nothing but lies spill out
Then they keep on, they keep on talking round and round
They are trying to pacify the crowd
So many rules and regulations
They're trying to put us in our place
They will make us feel so comfortable
And then they will say it keeps us safe
But it only makes things scary, And pours us full of fear
got to work together, we got to work together
got to work together, we got to work together
