Sleepwalker

Alien Ant Farm

This repercussion's messing with your ghost I feel you through the air now Wish I could tell you that I miss you most I miss you most, all the time now

Sleepwalker miss you much I can almost feel your touch It's killing me And I want it Sleepwalker miss you most I can almost see your ghost Scaring me and I'm haunted

You left me nothing but a broken soul An empty hole, memories bleeding And all our friends they say to let you go But they don't know You're still breathing

Dead or awake, you said you'd always be Right with me Asleep or alive you swore you'd never leave But I can see you

And all our friends they say to let you go But they don't know You're still breathing...
