## **Whispering Your Name**

**Alison Moyet** 

When she said that you were through I thought that there was nothing that I could do Just because she ran right here Doesn't mean I interfered Now I'm wondering of we can feel the same Cause she keeps whispering your name She keeps on whispering your name Like she's just waiting

She once told me how she felt Didn't just want me to hear it from someone else There were unknowns she couldn't know But she hoped you two would grow And when you didn't she was brought to me in pain

And she keeps whispering your name She keeps on whispering your name Like she's just waiting

If it's just a little fling a simple thing I'll try not to pretend If it's just for jealousy she's using me That might be hard to mend

Oh what else can I do But try to give her more than she got from you And when she wakes up suddenly and she says you name to me I'll just hope its force of habit and not need

Cause she keeps whispering your name She keeps on whispering your name Like she's just waiting

Oh tell me what is fair When nothing's wrong And she just stares Like she's just waiting
