

Goodbye Forever

Alkaline Trio

Take your wings outside, you can't fly in here
Besides, a purple sky is better soaring for you my angel
You're angel, you little devil
As for me I'll stay inside
I'll be just fine and I'll watch from the window.

Cannot categorize the nature of this sickness
a miracle that you're alive-
Stuck to the roof of my mouth with a staple.
Remember last april when we saw u.s. maple?
Somehow the singer showed the fireside exactly how i feel.

And we say goodbye, and go underground
Or up towards the sky, up in smoke, burnt down to size.
At least we're still friends.
At least we're still alive.

Take your wings outside,
No use for them in here.
Bad luck to open inside, work like umbrellas, like a broken mirror.
It's getting clearer-
The end is closer than ever before and you'll want nothing more
Then your head hits the floor, and you're lost in the darkness.

And we say goodbye and go underground.
Or up towards the sky,
Up in smoke, burnt down to size.
At least we're still friends.
At least we're still alive.

And we say goodbye and go underground.
Or up towards the sky,
Up in smoke, burnt down to size.
At least we're still friends.
At least we're still alive.
