

# Wild Hearted Woman

All About Eve

Baby sings the blues... for you  
She may get happy later  
Baby cries, for comfort  
For something to surround her

And when she sings it  
You believe her  
How everyone she ever knew  
Would leave her spinning 'round  
All on fire

Another wild hearted woman  
Another child with the stars in her eyes  
A wild hearted woman  
And she's falling... falling

Baby's lost her soul... to you  
Call her a fallen angel  
Stormy weather, forever  
With every friend a stranger

And when she sings it  
You believe her  
How everyone she ever knew  
Would leave her spinning 'round  
All on fire

Another wild hearted woman  
Another child with the stars in her eyes  
A wild hearted woman  
And she's falling... falling

Lost little girl  
In hurricanes of love and pain  
Locked in her world  
Of daisy chains and love and pain  
Trying to find peace of mind

Another wild hearted woman  
Another child with the stars in her eyes  
A wild hearted woman  
And she's falling... falling

Another wild hearted woman  
Another child with the stars in her eyes  
A wild hearted woman  
And she's falling... falling

Falling...
