We Are Through

Everytime you called my name I was always there for you But when I needed you To hold me an excuse

Now leave me alone Just get out of my life You keep pretending that we're ok That's not true 'Cause we are through

I gave my life and love to you I can't change what I've done The past a better life for me has come And I promise That you'll find love again I know you want it all to s top so Turn around and Don't look back you'll see the pain will go away

Not a word you say is true What do you want from me? I believed in us for so long I can't stand you anymore 'Cause we are through

I gave my life and love to you

I can't change what I've done The past a better life for me has come And I promise That you'll find love again

I know you want it all to stop so turn around and Don't look back you'll see the pain will go away

We're done now I've had it I promise you it's for the best Just move on and you sure will find somebody new

I gave my life and love to you

I can't change what I've done The past a better life for me has come And I promise That you'll find love again

I know you want it all to stop So turn around and Don't look back You'll see the pain will go away
