Forever In Your Hands

All That Remains

I know that I can stand my head high Forget not where I fall Still I find why and reason

Yet that conflict still filling me Mistrust venom inside of me I am not the man that you see Just look inside me

Trust in me the way I trusted you I know we could have done this together If you believed in me like I believed in you My heart would be forever in your hands

How I miss February still Now that this becomes the moment Of all our failures

Yet that conflict still filling me Mistrust venom inside of me I am not the man that you see Just look inside me

Trust in me the way I trusted you I know we could have done this together If you believed in me like I believed in you My heart would be forever in your hands

Trust in me the way I trusted you I know we could have done this together If you believed in me like I believed in you My heart would be forever in your hands
