

Black sky, black sky
What's wrong with me?
Black sky, black sky
What's wrong with me?
Nothin' means nothin' to no one
I know unless it's a lie
A lie is the only thing I see
When I look in their eyes
I know there's no good but everything is bad
And it hurts to be apart
Black sky, black sky
What's wrong with me?
Why do I cringe at the things
That they say and I end up with you?
And why do I try when it's over
You die and I'll end up with you?
I know there's no right but every thing's wrong
And it hurts to be apart
Black sky, black sky
What's wrong with me?
It's me or them, them or me
It's me or them, them or me
Black sky, black sky
What's wrong with me?
Black sky, black sky
What's wrong with me?
Nothin' means nothin' to no one
I know unless it's a lie
A lie is the only thing I see
When I look in their eyes
I know there's no good but everything is bad
And it hurts to be apart
Black sky, black sky
What's wrong with me?
It's me or them, them or me
It's me or them, them or me
It's me or them, them or me
