

# Across The Folded Line

Allegaeon

Inside a rational haze through an irrational gaze  
The future in reverse a path to primitive days

Singularity returns as normality turns  
Zero volume infinite density the hourglass of humanity burns

Mechanisms machines to mold our fate as we travel across the folded line

Backwards in time  
Through a tear in the sky  
Through the mirror universe  
Staring back at familiar eyes

Symmetric in time  
Across the folded line  
Outside the horizon  
Reform to original design

To re-write the past is to reform the future  
Erase all account  
Dissipating doubt

Parallel point of origin  
Lines of time diverge  
Endless chance to change the past  
To make the lines converge

A spatial shortcut through electric lines of force  
An exchange of space and time

A linear shortcut through electric lines of force  
An exchange of matter and time
