

Mountain

Aloha

One more layer of love is piled on
We're making a mountain
You could never dig a grave
Big enough for all of us

Upward ever, ever upward
We'll need a light on top to chase the planes away
But the birds can stay forever
Upward forever

We're on the fringe again
Growing bright in the moonlight
We're on the outside
Growing bright in the moonlight, alright,
Go with us into the night

A new layer of love is piled on
We're just getting warm here
You could never build a jail
Strong enough to keep us apart

Upward ever, ever upward
We'll need a light out front to tell the left behind
That it's alright
Upward ever, forever

We're on the fringe again
Growing bright in the moonlight
We're on the outside
Growing bright in the moonlight, alright,
Go with us into the night

Oh, one more layer of love
Upward ever, ever upward
We need a light on top to chase the planes away
But the birds can stay
Ever upward, forever
One more layer of love
