

Look into the darkness  
I'm dancing in the shadows with you  
There's a world waiting out there for us to see

...

And beneath the starlit blanket  
Dreams are made in solid gold  
I just wanna be the one to hold you there  
When you're cold

With so many pictures on the walls  
Of five billion minds  
We just need to take them out sometime  
Y'know and start living the good times

...

Distant dreams and pictures make you airborne  
When you close your eyes

That's why i wanna fly with you tonight  
No one else, no one else can make the flight like you  
So I wanna fly with you tonight  
And no one there, oh lord oh lord (?)

I'm obviously indebted to you  
By the way that you make me feel  
Ice cold warm heart  
Is always gonna be able to turn a dream to real  
I say  
I'm touching all horizons with you  
I got my sights on solid gold  
I feel superhuman baby  
Y'know like the way the marvel make man feel in their shows  
Now check out what my mind say  
Check out what my words say  
Check out all my actions  
I just want your satisfaction because

Youknow cause I wanna fly with you tonight  
Oh no one else, no one else can make the flight like you  
So i wanna fly, oh, with you tonight  
And make dreams, make a dreams a real life  
I can oh

You got to take my hand lady  
Oh yeah  
Then you'll understand what i'm saying  
And you know we gonna find the ideal destination  
I say I say  
I, I wanna fly with you tonight
