

Waiting

Alpha

Make me hopeless baby
Move the light and shade me
Take my sight and blind me
Leave a taste to remind me

The clouds openly like raining for you
So have and hold me
A moment told me
I need always with you

Make me hopeless baby
Coloured skies are fading
Only silence surrounds me
Need you're touch to refine me

And i openly like waiting for you
To have and hold me
A moment told me
I need always with you
