## Waiting

## **Alpha**

Make me hopeless baby
Move the light and shade me
Take my sight and blind me
Leave a taste to remind me

The clouds openly like raining for you So have and hold me
A moment told me
I need always with you

Make me hopeless baby Coloured skies are fading Only silence surrounds me Need you're touch to refine me

And i openly like waiting for you To have and hold me
A moment told me
I need always with you
