## **Guardian Angel**

## **Alphaville**

Be my guard just for tonight That is all I'm asking for Take me under your wing I can't make it anymore

I am so full of fear
May you read a book to me
And when the shadows grow
won't you stay with me

Will you be my guard tonight That is all I'm asking for Will you be my guard tonight That is all I need to know

Be my guard beside my bed That is all I need to know Would you please hold my hand Don't you ever let it go

All the wonders of the world For a little second more I can't speak but can't you see It's your touch I'm crying for

Will you be my guard tonight That is all I'm asking for Will you be my guard tonight That is all I need to know

That is all I'm asking for That is all I need to know That is all I'm asking for

Be my guard just until dawn
When I can hear the birds again
I'm as helpless as can be
Will you guard my little flame

If we never meet again You shall always keep in mind That you were my guard tonight That you were my guard tonight

Will you be my guard tonight That is all I'm asking for Will you be my guard tonight That is all I need to know

Will you be my guard tonight That is all I'm asking for Will you be my guard tonight That is all I need to know

That is all I need to know That is all I need to know That is all I need to know That I want I need to know
