

Speed Of Light

Alphawezen

Touch me
I am losing shape
Look I am invisible
Can you say my name

If there's a perfect sky that we came from
We'll be like stars forever shining on

Catch me
I am almost there
How can I be near
I am highspeed
I am everywhere

I couldn't catch your smile
You are blinded by another side
I couldn't say goodbye
You are traveling at the speed of light

You and me
We never cross the boundary
That's how I know you
I can hear you say

You and me
We never unveil mysteries
Once you are shining
We never tried again

You and me
We never cross the boundary
That's how I know you
I can hear you say

You and me
Always traveling separately
When I try to reach you
You are miles away

You and me
We never unveil mysteries

Touch me
I am losing shape
Look I am invisible
Can you say my name

If there's a perfect sky that we came from
We'll be like stars forever shining on

Catch me
I am almost there
How can I be near
I am highspeed
I am everywhere

You couldn't read my mind

How I wanted you to hold me tight
I couldn't save that night
I was passing by at the speed of light

You and me
We never cross the boundary
That's how I know you
I can hear you say

You and me
We never unveil mysteries
Once you are shining
We never tried again

We are flesh and we are free
We are drift wood in the sea
From the distance we are stars
Like there is a face on Mars

We are lost and we are one
We are neighbours to the Sun
Slowly drifting out of sight
Traveling at the speed of light
