

# White Noise

Alphawezen

Sometimes You`re just a heartbeat away And it feels like we could sway Like I could lean my head right on your back And I would like to say

Kiss me, Tell me you care and you miss me One more time I am waiting Eye to eye, passing by, cave in Every time

When you`re close to me The White Noise disappears The way you smile just breaks my heart because I know we`ll fall apart

When you`re next to me You feel so unreal You`re always there but never near Like you`ve just left the atmosphere Behind Within my mind

Somehow I couldn`t find the words by now But when I close my eyes tonight The noise within my empty head just sounds like that :

Kiss me Tell me you care and you miss me One more time I`m still waiting Show me you`re not hesitating To lose your mind

When you`re close to me The White Noise disappears The way you smile just breaks my heart because I know we`ll fall apart

When you`re next to me You feel so unreal You`re always there but never near Like you`ve just left the atmosphere Behind Within my mind
