

## Unchain the Rain

Altaria

We tread these paths of light so long  
I'm right beside you just like thousand times before  
I'm knocked at agony, I face a tragedy  
That feeling, deceiving, that burning your soul  
My kingdom come, my will be done  
So join me fallen one

We'll drown our sorrow to this endless sea  
Together we'll unchain the rain  
Escape the world into our sanctuary  
There in my arms you'll be free

Your guilt I will justify  
I'll make you mine  
To have, to hold and embrace  
A spark of mystery  
The dark discovery  
In your laws my greatest victory

Closer a part, to offer hearts  
Let us share the stars

Drown your sorrow to my endless sea  
Together we'll unchain the rain  
Escape the light into our sanctuary  
There in my arms you'll be free

So may times we have been fallen  
So many times I've heard you swearing that we're through  
As many times you have come crawling  
Cause no-one else can ease your pain the way I do

We'll drown our sorrow to this endless sea  
Together we'll unchain the rain  
Escape the light into our sanctuary  
There in my arms you'll be free

We'll drown our sorrow to this endless sea  
Together we'll unchain the rain  
And share our secret night-time fantasy  
Together in forever sleep
