

# Disobey

AlunaGeorge

Stay, oh woah, let's stay  
Turning into the ground  
So sure, so sure,  
No need to make a sound  
And when you start  
To feel like a stranger hold onto my hand  
And then we'll grow  
Into the place where we'll be coming land

Let your angel disobey  
And show the grey in the black and white  
Baby in the wrong and right  
Let me go and hold me tight  
Let your fever melt away  
And slow down at the green light  
Breathe in the air tonight  
Pull me in and hold me tight

Lay, on my shoulders  
Keeps me ready to fly  
Oh slow, oh slow,  
Some fight to raise my silk  
And when its time  
You're going need the strength to cut me loose  
And if you climb  
You can escape this world of self abuse

Let your angel disobey  
And show the grey in the black and white  
Baby in the wrong and right  
Let me go and hold me tight  
Let your fever melt away  
And slow down at the green light  
Breathe in the air tonight  
Pull me in and hold me tight

Let your angel disobey  
And show the grey in the black and white  
Baby in the wrong and right  
Let me go and hold me tight  
Let your fever melt away  
And slow down at the green light  
Breathe in the air tonight  
Pull me in and hold me tight

Let your angel disobey  
And show the grey in the black and white  
Baby in the wrong and right  
Let me go and hold me tight  
Let your fever melt away  
And slow down at the green light  
Breathe in the air tonight  
Pull me in and hold me tight
