

We Are Chosen

AlunaGeorge

Watching, you slip through the cracks
Then you came back
See those faces, listen to you
Their world is new

You so simple intuition boy
With your vision you can bring me joy
You're getting under my skin, under my skin
you're getting under my skin

Bring a little revolution here
Show me love will take away my fear (show me)
Show me how you're gonna bring me near

Now that you started a fire you can't put it out
I'll be frozen
Something inside me was choking when you let it out
We are chosen
