

Where's the life in your eyes?
When does light finally ignite?
You take the pain in different ways
Can you escape from all of the toxicate?

You're not a freak to me
So look at me
You're not a creep to me
So speak to me
You're not a weirdo
If that's what they say you are
Well then I'm a freak too

Don't waste time standing in line
To check your sainty level, yeah, you're just fine
You've become a nameless one
Fight against the bad of an incomplete someone

You're not a freak to me
So look at me
You're not a creep to me
So speak to me
You're not a weirdo
If that's what they say you are
Well then I'm a freak too

Take a look around and see
Just how normal we can't be
This is my epiphany

You're not a freak to me
So look at me
You're not a creep to me
So speak to me
You're not a weirdo
If that's what they say you are

Then I'm a freak, too

(That's what we all are)
