

Cry

Amanda Stott

Can't find the words
Can't find the sounds
These streets run wild, my stars are crossed
The dreams you want most are the ones that get lost

Can't find my pride
Where did it go
I close my eyes the room goes round
In a river of tears falling down on the ground

Every time I walk away
Something you say always pulls me back
And I see my whole life right before my eyes
Every time I try to break away baby it's no lie
When I look into your eyes
I just want to cry

You pull me close but you're miles away
Without your love my heart gets cold
The things I held near were the things that you stole

Every time I walk away
Something you say always pulls me back
And I see my whole life right before my eyes
Every time I try to break away baby it's no lie
When I look into your eyes
I just want to cry

Every time I think about it I cry
Everyday I live without it, every time

Every time I walk away
Something you say always pulls me back
And I see my whole life right before my eyes
Every time I try to break away baby it's no lie
When I look into your eyes
I just want to cry
