

All Night

America

When the day breaks
Something begins
When your heart aches
Do you give in?
I heard that you were lonely
One careful look shows you're lonely

All night you'll fight
With your mind, with your mind

After lights out, don't make a sound
Apple blossoms, come fallin' down
Black and white sun shining brightly
Shelter your eyes, hold on tightly

All night you'll fight
With your mind, with your mind

Love thy neighbor
You will understand
Coffee flavor, yours or any brand
I heard that you were lonely
Nothing is real when you're lonely

All night you'll fight
With your mind, with your mind
