

Honey

America

Honey, I wish you were here
To brighten my lonely nights
How long I've waited
To hold you in my arms again

Honey, you know I'm so scared
Scared that you might not come back
One day without you
Is one day too long for me
Wish you could see
The love in the heart of me

Honey, I really miss you
Honey, I need to kiss you
Honey, I wanna hold you
Honey, have I told you
I really need you now
I really need you now

Honey, you know you think like me
Now I pray every day
I'll do anything
If there's a chance you'll stay

Your perfume is still in my room
Your pillow it's left where you lay
Your picture is standing
Inside the frame I made
It seems so sad
To lose the love we had

Honey, I really miss you
Honey, I need to kiss you
Honey, I wanna hold you
Honey, have I told you
I really need you now
I really need you now

Honey, I've waited for only one line
To let me know how you are
I need to be with you
I'd run to your side, however near or far
Girl, I need you

Honey, honey
Honey, honey
Honey, I really miss you
Honey, I need to kiss you
Honey, don't you know it
Honey, don't I show it
I really need you now
I really need you now
I really need you now
I really need you now
I really need you now
I really need you now
