## I Do Believe in You

## **America**

They tried to catch us dancin' on the line They say we took it way too far this time They gave us no breaks here But we made our own I swear

I do, I do believe in you After all that we've been through I do, I do believe in you And everything that we do

We used to run with the dangerous crowd Where the flame was hot and burnin' out We knew we'd have to give
It hit us where we lived

I do, I do believe in you (I do believe in you) After all that we've been through together You took away my darkest nights (nights) No one else could see the light

Runnin' blind day after day Some things never wanna change, oh, oh We knew we'd have to give It hit us where we lived

I do, I do believe in you (I do believe in you) After all that we've been through You took away my darkest nights (nights) No one else could see the light

I do, I do believe in you (I do believe in you) After all that we've been through You took away my darkest nights (nights) No one else could see the light ...
