

# Coma

American Hi-Fi

I'll finish the master you started  
Just likely a vow brokenhearted  
My heart got a nervous kind of feeling  
Black, white, but my heart still beating

I'm living a morning ever after  
Keep begging an anything's better  
Time's ticking and ticking like a time bomb  
You're already gone but I want it more

Operator tell me is gonna end  
Hey ho!  
How the hell you've been?  
You got me in a coma, but I'm alright about it

I'm living the life that you started  
Just likely a vow brokenhearted  
You think I'm sleeping at the dream  
It's all about to get real  
So shut up and don't you ride crashing  
It's all about anything can happen now

Operator tell me is gonna end  
Hey ho!  
How the hell you've been?  
You got me in a coma, but I'm alright about it

A bow straight to my heart  
A bow straight to my heart  
A bow straight to my heart

The lights go out on you  
There's everything to lose  
The lights go out on you  
There's everything to lose  
The lights go out on you!  
There's everything to lose!  
The lights go out on you

Operator tell me is gonna end  
Hey ho!  
How the hell you've been?  
You got me in a coma

Operator tell me is gonna end  
Hey ho!  
How the hell you've been?  
You got me in a coma, but I'm alright about it

I'll finish the master you started
