

No Ordinary Life

American Hi-Fi

Everyone stop, nobody knows
That's the way that it goes
You tell me I'm wrong, you can be so cruel
You broke the rules
I still see you every night, brokenhearted eyes

I hear the drums from enemy lines, pounding out of time
They march alone down broken roads, no place to go
I still see you every night, by neon candle light

What's it all about now?
This was no ordinary life
It can't be undone now
Love only grows until it dies

Over the hill, a halo of lights, burning cities at night
We've come this far to be so close hangin' by your rope
I still see you every night, twisted alibis

What's it all about now?
This was no ordinary life
It can't be undone now
Love only grows until it dies

What's it all about now?
This was no ordinary life
It can't be undone now
Love only grows until it dies
