

Can We Go

Amerie

Let me sit down and tell you how this thing has really started
When I come around you act like loving you is under audit
So baby can you give me just little more (time)
Cause I'm having problem's trying to read your (mind)
I really don't know what to do with you
I was too into you now I'm through with you

Can we go
Can we go back (to where love is)
Can we go
Can we go back (to where love is)

Pretty memories coming back to me but I remember
What you said to me when you walked away the other day
Is what I remember most
Trying to get past the things you said
Holding on to all the love I thought we had
Wishing I could just replace
Trying to erase all the pain

Can we go
Can we go back (to where love is)
Can we go
Can we go back (to where love is)

Girl you know I can't forsee this
I wanna try but I can't deny this feeling

Baby think of what you're saying
Can we try cause I won't stop believing

Can we go
Can we go back (to where love is)
Can we go
Can we go back (to where love is)
(2x)
