

Red Eye

Amerie

You're tempting,
So sexy,
Two understatement of what you are,
Come closer,
Here to me,
Together baby we can go far,
Let me blow your mind sky high,
Like mile high,
So many things we can try,
If you're not scared to fly

I don't gotta be your only girl,
I just wanna take you around the world,
And your seats guaranteed
Here we are just me and you,
And the door is closing soon,
So relax and be free (And fly with me)
Just so you know now (And fly with me)
This is a red eye flight (And fly with me)
I know it's going down (And fly with me)
So lets get right

We spent some time on conversation
I think you know what it's time to do
You feel me and I feel you
Don't keep me waiting to long for you
You don't want to miss this flight
Not tonight
Don't have no reservations
I got your reservations
Baby come and take this trip
Yeah

I don't gotta be your only girl,
I just wanna take you around the world,
And your seats guaranteed
Here we are just me and you,
And the door is closing soon,
So relax and be free (And fly with me)
Just so you know now (And fly with me)
This is a red eye flight (And fly with me)
I know it's going down (And fly with me)
So lets get right

I can take you to where you wanna go
And I'm giving you your very own ticket
On this red eye
Come fly, baby fly with me
I can show you things you ain't seen before (yeah)
But first thing I gotta to know is if you with it (yeah)
With this red eye
Come fly baby fly with me

I don't gotta be your only girl,
I just wanna take you around the world,
And your seats guaranteed
Here we are just me and you,

And the door is closing soon,
So relax and be free (And fly with me)
Just so you know now (And fly with me)
This is a red eye flight (And fly with me)
I know it's going down (And fly with me)
So lets get right

I don't gotta be your only girl,
I just wanna take you around the world,
And your seats guaranteed
Here we are just me and you,
And the door is closing soon,
So relax and be free (And fly with me)
Just so you know now (And fly with me)
This is a red eye flight (And fly with me)
I know it's going down (And fly with me)
So lets get right
