Night Train

Amos Lee

I've been working on a night train Drinking coffee, taking cocaine I'm out here on a night train Trying to get us safely home

Well in a little country station Somewhere out in the midwest I see the people out there waiting Heart beating in my chest

And I'm thinking about a woman Who I would put no one above I'm not looking to replace her Just need someone to love

Well I'm out here on my night train Drinking coffee, taking cocaine I'm out here on a night train Trying to get us safely home

And I'm living in the city
Where the noise, it never stops
Hammers pounding on the pavement
Whistles from traffic cops

Nobody looks you in the eye here Walking around with clinched fists I've been searching for a simple place Don't know if it exists

There's a sunrise out there calling my name I can see her moving, I can see her moving

Well at a certain time of night, now I'll become one with the wind Where there isn't a beginning And there is no end

Oh when everything is flowing Everything is on time And I know that we're all going To the end of the line

Well I'm out here on my night train Drinking coffee, taking cocaine I'm out here on a night train Trying to get us safely home

Well I'm out here on my night train Drinking coffee, taking cocaine I'm out here on a night train Trying to get us safely home Trying to get us safely home Trying to get us safely home
