

Welcome To The City

Amy Diamond

Well done - Welcome to the city
You'll become number one with a witty tongue - we praise the young
Have a ball - Have it all, do whatever
Hit the wall - Get the call and you better pay
There's no other way

Throw your pennies in a wishing well
Might get heaven and you might get hell
Thunder, lightning ain't that kinda frightening
Saints and sinners on the road to fame
(You) ain't no winner 'til we know your name
Black white flashlight - show me what you got

Have a good bite out of the city
Take a long cold look at the world
You might crash - burn
Either way you'll learn
Good bite out of the city

Free your mind - your behind's gonna follow
Do the crime - Do the time when tomorrow comes
We're the pretty ones
Shop around, settle down, get a job, be a slob
What you get, what you give's your prerogative
That's how we live

Throw your pennies in a wishing well
Might get heaven and you might get hell
Black white flashlight - show me what you got

Have a good bite out of the city
Take a long cold look at the world
You might crash - burn
Either way you'll learn
Good bite out of the city

Show and prove - do or die
We don't sleep - we don't cry
Hit 'em low - hit 'em high
Take an eye for an eye

Have a good bite out of the city
Take a long cold look at the world
You might crash - burn
Either way you'll learn
Good bite out of the city

Repeat
