Find A Way

Take my hand, hold me close, every breath's a gift.. We don't know what tomorrow holds, but I know need you, you show me the truth.. And I will reach you.. Somehow..

I will find a way, build another world beyond the pain.. I'll find a way to keep you safe, until the end of time..

I can't, tears I've cried, nothing in this world will move me.. I'm never gonna leave your side, I want to see your face and hide in your wake.. As long as you are with me..

I will find a way, build another world beyond the pain.. I'll find a way to keep you safe, until the end of..

Break the chains within your mind.. Fighting blindly through the dark, I know you hear me, I would give what I If it would save you from this..

I will find a way, build another world beyond the pain.. I'll find a way to keep you safe, until the end of time..
