

# A Bullet In The Head

Anarchy Club

The system is broken  
The machine needs repair  
Condition critical  
The stone in the gears  
The sum of your fears  
A free radical  
A better tomorrow  
Survive through the sorrow  
Of hypocrisy  
The feeling is hollow  
When you beg, steal and borrow  
For your liberty

All that was and all that is  
All that takes and all that gives  
All that hates the all that loves  
All that pushes all that shoves  
All that fucks and all that fights  
All that kisses sweet goodnights  
All the virgins all the whores  
All the less take all the more

Your feigned crucifixion is just blasphemous fiction  
Like all that you hold dear  
My heroes have died  
And the movies all lied  
I'm still standing here

A bullet in the head would take away the sorrow  
A bullet in the head would take away the lie  
A bullet in the head would take away tomorrow  
A bullet in the head but I don't wanna die

All that was and all that is  
All that takes and all that gives  
All that hates the all that loves  
All that pushes all that shoves  
All that fucks and all that fights  
All that kisses sweet goodnights  
All the virgins all the whores  
All the less take all the more

A bullet in the head would take away the sorrow  
A bullet in the head would take away the lie  
A bullet in the head would take away tomorrow  
A bullet in the head but I don't wanna die

All that was and all that is  
All that takes and all that gives  
All that hates the all that loves  
All that pushes all that shoves  
All that fucks and all that fights  
All that kisses sweet goodnights  
All the virgins all the whores  
All the less take all the more
