

Playing my part in the dream  
Light shines through cracks in a scream

The sun, the sky  
Are brighter in your eyes  
We live, we die  
Not knowing why  
A scratch, a bite  
And then a flash of light  
As world's collide  
It's you and I

I'm just a ghost in this shell  
Finding your heaven in hell

The sun, the sky  
Are brighter in your eyes  
We live, we die  
Not knowing why  
A scratch, a bite  
And then a flash of light  
As world's collide  
It's you and I

Time and tide  
When worlds collide  
Tomorrow comes today  
First to last  
When future's past  
Is here with me to stay

Playing my part in the dream  
Light shines through cracks in a scream

The sun, the sky  
Are brighter in your eyes  
We live, we die  
Not knowing why  
A scratch, a bite  
And then a flash of light  
As world's collide  
It's you and I

The sun, the sky  
Are brighter in your eyes  
We live, we die  
Not knowing why  
A scratch, a bite  
And then a flash of light  
As world's collide  
It's you and I
