

# The Storm Before the Calm

Anathema

Never, never, never, never ever, never leave you  
I will, I will, always, always be here for you  
Found you, found you, found you  
I will, never ever leave you  
Never  
I will, always, be here with you  
together, together, together, together, together,  
together

It's getting colder, I'm getting colder, colder, it's  
getting colder  
But in the colder, till? I feel anything at all  
It's getting colder, it's getting colder, colder

Come on?, come on?, I will?, love you, touch you,  
nothing  
I will?, love you, love me, fully, always, found you,  
Ever, together, together, together, together, together

It's getting colder, I'm getting ?, colder, it's  
getting colder  
But in the colder, don't think? I feel anything at all  
It's getting colder, it's getting older, colder, I'm  
getting colder  
But in the colder, don't think? I feel anything at all

The shadows, the shadows  
It ebbs and flows  
It comes and goes  
It eats you up and lets you go  
It eats inside and splits your mind  
To search around for others kind  
To gather strength from the depth  
To fight the fight from day till night, till night,  
till night

this beautiful feeling sails over the skies  
moving through my body and my mind  
It rises across my brain  
this is fucking insane, this is fucking insane

Am I still here  
This wonderful feeling  
Am I still alive  
This wonderful feeling  
Am I still here  
This wonderful feeling  
Am I still alive  
This wonderful feeling  
something more at the end..
