

## Someone Anyone

Anberlin

Thought we were past this  
Thought we moved on  
But I guess I was wrong  
Do we not learn from mistakes?  
Do we not have what it takes?  
Are you the cure or disease?  
Do you still take as you please  
Are you the cure? Or are you the disease?

Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Someone, someone, tell me why we need this  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive

Forward we find, yesterday's gone  
And I hope that I'm wrong  
If we don't learn from their past  
We'll repeat their history, oh, at last

Are you with us or without?  
Scene is set but fading out  
Are with us, well are you with us?

Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Someone, someone, tell me why we need this  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive

Are you the cure or disease?  
Do you still take as you please?  
Are you the cure? Or are you the disease?

Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away truly alive, truly alive

Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Someone, someone, tell me why we need this.  
I don't see a reason, tell me why we need a reason
