

Turn Up The Sound

Andain

Open the dark side of me
Find what your faith needs to be
Help me gain focus on you
Heart bleeds, I know what to do

So turn up the sound now
Make it feel louder
Who is it playing
Are you still here

Who's all around now
Are you still listening
What are they saying
Was it clear

Turn up the sound now
Lost in the crowd and
I haven't heard this one before

Turn up the sound now
What are you saying
No, I'm not listening anymore

Please don't confess to the sin
Unless you're set to begin
Fall out seems more than just trust
Walls down now dive into us

So turn up the sound now
Make it feel louder
Who is it playing
Are you still here

Who's all around now
Are you still listening
What are they saying
Was it clear

Turn up the sound now
Lost in the crowd and
I haven't heard this one before

Turn up the sound now
What are you saying
No, I'm not listening anymore

Turn up the sound now
Make it feel louder
Who is it playing
Are you still here

Who's all around now
Are you still listening
What are they saying
Was it clear

Turn up the sound now

Lost in the crowd and
I haven't heard this one before

Turn up the sound now
What are you saying
No, I'm not listening anymore
